## POLYURETHANE (AUSTANE®)

## SPECIFICATIONS SHEET

## DETAILS

Chemical Name: Polyurethane
Common/Trade Names: Austane ${ }^{\circledR}$, Urethane ${ }^{\circledR}$, Lurathane ${ }^{\circledR}$
Abbreviation: PUR
Properties (Colour): Typical colours range from black, red, greens, yellows and blues to name a few. Colours will determine a hardness grade with most manufacturers.
Properties (Form): Rod, Sheet, Tube, Custom
Machining: Can be difficult to machine. Hardnesses above 80 Duro are more readily machined; below this hardness parts are usually cast to shape or rough machined. Closer tolerances are achieved by grinding.
Types: Polyester base. Urethanes mostly for dynamic applications. Polyether base Urethanes for moist environments. Hardness range from 40 Duro'A' to 75 Duro 'D'. Cellular foam.
Chemical Resistance: Resists water, oils, chemicals and solvents.

## KEY BENEFITS

- Can be cast with low cost moulds
- High impact resistance
- Good abrasion \& tear resistance
- Resilient
- Good load-bearing capacity

## PROPERTIES

| Hardness, Shore A | $92-94$ |
| :---: | :---: |
| Modulus MPa (psi) | $100 \%$ |
| Elongation, \% | $800 \%$ <br> $11.4(160)$ |
| Split Tear Strength, D470, kN/m (pli) | $520 \%$ |
| Trouser Tear Strength, D1938 kN/m (pli) | $24.5(140)$ |
| Compression Set \% <br> (method B) 22hrs@70 ${ }^{\circ} \mathrm{C}$ | $44.9(256)$ |
| Bashore Rebound \% | $27 \%$ |

## PROPERTIES

| Compressive Modulus, MPa |  |  |
| :---: | ---: | ---: |
|  | $5 \%$ | 1.72 |
|  | $10 \%$ | 3.24 |
|  | $15 \%$ | 5.83 |
|  | $20 \%$ | 6.72 |
| Tangent Delta, $30^{\circ} \mathrm{C}\left(86{ }^{\circ} \mathrm{F}\right)$ | $25 \%$ | 0.040 |
| Tangent Delta, $120^{\circ} \mathrm{C}\left(302^{\circ} \mathrm{F}\right.$ | 0.026 |  |
| DIN Abrasion | Relative volume loss (mm3) |  |
|  | Abrasive Index | 29 |
| NBS Abrasive Index \% |  | 498 |

*Whilst all care has been taken to provide accurate \& up to date information, we cannot provide legal certification of properties. We recommend that this information be used as a design guide only. Actual testing should be undertaken to confirm data if certification is required.*
